4. RANGE OF OCCUPATIONS ACCESSIBLE TO THE HOLDER OF THE CERTIFICATE

The Road transport driver is employed at a transport company, as it's own carrier or in other businesses with a transport department. His workplace is his truck in all possible variants and designs (assemblies of vehicles including trailers and semi trailers, load carriers such as drop boxes and containers). European regulations require, in addition to a valid driver's license of the corresponding category, proof of professional competence (code 95) for driving a truck. This allows the Road transport driver to transport cargo throughout Europe with most types of trucks. The certificate of professional competence (code 95) must be maintained by completing 35 hours of further training every five years. Additional rules have been imposed for certain types of cargo and trucks. The Road transport driver diploma does not cover these additional requirements.

6. OFFICIALLY RECOGNISED WAYS OF ACQUIRING THE CERTIFICATE

<p>Senior secondary vocational education features two learning pathways: the school-based pathway (bol) and the training on the job pathway (bbl). In the school-based pathway, the majority of the course consists of theory at school. The extent of the practical component (vocational practice) is between 20% and 60%. In the training on the job pathway, the extent of vocational practice is at least 60% of the course. The participant works four days a week in a training company, and attends school for theory subjects just one day a week. In principle it is possible to follow both learning pathways, but which pathway is offered will depend on the individual educational institution.</p>
